Questions and Answers

about Asbestos and EPA's Investigation

Q : When does EPA anticipate having an onsite EPA Field Project Manager in Libby?

A : EPA is pleased to announce Mike Cirian has accepted the Libby Field Project Manager position. He comes highly recommended by the respected U.S. Army Corps of Engineers Rapid Response group in Omaha.

Mike spent 14 years with the U.S. Army Corps of Engineers. He has extensive experience as an Environmental Engineer conducting environmental restoration at various military facilities. He volunteered for and served six months in Mosul, Iraq as Chief of Engineering and Construction carrying out civilian reconstruction and military construction projects. Mike served on the Columbia shuttle recovery, quickly rising through the command to effectively serve as Deputy Incident Commander during his stay.

Mike, who will move his family from Wisconsin, will transition through the Region 8 office prior to his assignment to Libby. He should be in Libby within the next month or two to make arrangements for relocation and meet some of the large team of people -both in and outside the government - working on the Libby Asbestos Cleanup. Please welcome Mike as a new team member. Mike is looking forward to being in Libby for the duration of the clean up work
